

# INDEX TO VOLUME 73 — METAL FINISHING

JANUARY-DECEMBER, 1975

(Compiled by N. Hall, Editor, I. Oquendo, Production Manager and C. Bunce)

In this index all material that appeared in the January through December 1975 issues of *Metal Finishing* is listed according to subject matter, with cross references where required. Following each listing will be found a letter indicating the manner in which the material was published, as follows:

(S)—Shop Problem (R)—Recent Development (M)—Manufacturers' Literature (B)—Book (P)—Patent

Any reference not followed by a letter was a feature article. The numbers in the right-hand column refer to the month and page numbers; 6-85 means June issue, page 85, etc.
